DETAILED ACTION

1. This action is in response to applicant's response filed on April 21, 2006. **Claims 1-44,72-81** are now pending in the present application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brenna Brock on August 18, 2006.

The application has been amended as follows:

Replace claim 43 with the following claim:

- 43. A computer program product comprising:
- a tangible computer readable media storing program instructions, wherein the program instructions are executable to:
- present an option to specify a quorum associated with a meet-me conference call, in response to user input to an application program co-resident with a terminal; and
- initiate establishment of a media transport channel after detecting that the quorum is established, in response to a user selecting the option, wherein establishment of the media transport channel joins the user to the meet-me conference call.--

Cancel claim 44

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the application is allowable for the reasons set forth on pages 1-5 of the Applicant's response filed on April 26, 2006 and in view of the above Examiner's amendment with respect to claim 43.

Regarding claims 1,22,43 and 72, as noted therein, the claimed invention requires *inter alia* joining a meet-me conference call including presenting an option to specify a quorum and establishing a media transport channel after detecting that the quorum is established when the user selects the option whereas the closest prior art Sun in view of Armstrong only teach joining a meet-me conference call in response to establishing a quorum and establishing a media transport channel and do not teach or suggest presenting a user with an option to specify a quorum and in response to a user selecting the options establishing the media transport channel after detecting that the quorum is established. While Armstrong describes the use of a quorum for a conference, Armstrong does not specifically teaches of present the option in response to a user input and thus fails to specifically teach or suggest each limitation of at least the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
